Quick Service Restaurant

Automated Food Temperature
Monitoring Solution

John Ivers EMOTx 6478 Black Walnut, Brighton, MI 48116 PH: 248.459.7691
EM: jivers@emotx.com

Why

- We want to share with you an opportunity that will result in the following:
 - Automation of Food Temperature Monitoring in Quick Service Restaurant (QSR) applications.
 - Resulting Benefits include Quality Assurance, Automation/Standardization of Food, Preparation, and Storage Temperature Data.
 - Unlimited Marketing opportunities.

Who

EMOTx is an Integrator of wireless Active RFID, UHF, and Wi-Fi technology to provide Enterprise Asset Management (EAM) and visibility solutions.

We are a Michigan based small business who's founding members share a unique blend of Engineering, Digital Media, Food Service, and Marketing experience.

How

EMOTX's Three Active RFID Platforms Served:

- **DASH7 (433Mhz)** – Very Long Range (4000m), Very Low Power, Light Data
- **UHF (915Mhz)** - Intelligent Long Range Solutions (1500m)
- **WiFi (2.4GHz)** – Wi-Fi solutions utilizing existing wireless infrastructure. (short range yet very high data transfer (video, audio, etc.).)

What

EMOTx Temperature Monitoring Solutions (TMS) provide an automated way to measure, monitor and manage QSR food preparation areas where consistent or certain temperature ranges are required.

This solution monitors and automatically alerts when the temperature in a storage unit, cooler, steam table, refrigerator, oven, or dining area goes outside a pre-defined range. In turn, the system provides historical reports and remote real-time views of the monitored temperatures.

When

EMOTx would appreciate the opportunity to discuss QSR Temperature Monitoring Solutions (TMS) with you and your teams of “Smarter Food Services” technology solution providers.

Our vision would be to establish standardized equipment and procedures for your company and pass additional technology along to franchisees and partners.

EMOTX.com

Automated Food Service Temperature Monitoring Solutions

EMOTX temperature monitoring solution provides an automated way to measure, monitor and manage QSR food preparation areas where consistent or certain temperature ranges are required to keep a process going.

This solution monitors and automatically alerts when the temperature in a monitored storage unit, such as a freezer, refrigerator or oven goes outside a predefined range and provides historical reports and real-time views of the monitored temperatures.
